

LARGE SIZE PLASMA DISPLAYS

PANASONIC 103" Plasma Monitor

At 103 inches, Panasonic's flagship plasma display, the TH-103PF12U, is one of the industry's largest plasma panels. Backed by a service life of 100,000 hours, this super-sized display provides stunning images and features full HD resolution with 1,920 x 1,080 pixels, a contrast ratio of 40,000:1, and an effective display area equivalent in size to four 50-inch Panasonic plasma displays. With built-in support for up to a 5 x 5 video wall, the 103-inch is a showstopper for a wide-range of professional applications including live events and exhibits, boardrooms, digital retail signage, and more.

This huge plasma display can easily serve as a whiteboard for conference rooms or as a large video poster in retail spaces. Installed in portrait orientation, it can display a person, life-sized. It's an ideal large-screen display for use in presentations with a large number of viewers, or as a digital signage system.

LARGE SIZE PLASMA DISPLAYS

SCREENLIFTER 103" Design stand

Using the ScreenLifter, the handling and setup of the newest generation of 103" large displays becomes a mere child's play. At the touch of a button the up to 500 lb heavy display unloads itself from the flight case. Thanks to the precise heavy-duty lifting mechanism, the ScreenLifter allows stepless adjustment of the display height. The display can even be rotated into portrait orientation.

The ScreenLifter with its integrated shock absorbing system combines a secure and convenient storage and transport system with a stylish designstand that allows the tool-free setup of the display by just one person. The display is permanently attached to the ScreenLifter, which significantly reduces the risk of damage during handling and saves precious time and cost of labor.

No compromises were made in the development of the ScreenLifter to meet the targets of perfect function and premium design. Its elegant and unobtrusive design makes the ScreenLifter the perfect match for the exquisite Panasonic TH-103 plasma display.

The flight case fits through a standard door frame, which makes it possible to set up the ScreenLifter in virtually any location. Setup and operation of the ScreenLifter are entirely tool-free and made simple by the control unit's pre-programmed memory positions. The control panel features a LED display that shows the height of the bottom edge of the displayed image.
