

AUDIENCE RESPONSE SYSTEM

The Reply Mini Plus

Tallen Technology Rentals employs the latest in Audience Response System (ARS) technology, software, and service. **The Reply Mini Plus** keypad together with the Tallen software packages, represents the most powerful, reliable, and trusted ARS technologies available today. The solid construction and small size make them a truly **portable** and amazingly **powerful** audience response solution.

Advanced hardware features include:

- 2.4 GHz radio frequency (RF) with signal avoidance
- Multi-color LED for user feedback and vote confirmation
- 14 elastomeric buttons
- Multiple-digit entry for sophisticated data collection
- Advanced visual vote transmission acknowledgement
- Multiple-choice selections
- Advanced log-in for vote tracking and attendance taking
- Up to 31 simultaneous sessions can run in close proximity
- Breakout room feature allows users to move from room to room using the same keypad without interference
- Speed scoring with accuracy to .05 seconds
- License-free / license-exempt frequency means the keypads are approved for use worldwide
- Deep sleep mode (no on/off button)
- Long-life lithium coin cell battery ~ 20,000 responses
- Lanyard connectable
- Ultra portable

Advanced software features include:

- PowerPoint compatible
- Questions may now have up to 30 choices (up from 10)
- Accommodates weighted voting
- Prioritize lists of up to 99 items
- Individual vote tracking
- Demographic filtering
- Side-by-side comparison of collected data
- Competitions and game shows with advanced scoring capabilities
- Speed scoring
- Advanced strategic planning functionality with X-Y opportunity maps
- Detailed reporting capabilities
- Display a "call-on-me" list to handle audience questions

AUDIENCE RESPONSE SYSTEM

-How it works-

Audience members respond to questions and statements posed by the presenter using sophisticated yet simple-to-use wireless keypads. Each response is captured, recorded, and immediately displayed in a variety of graphical formats. Responses can be anonymous or tracked by individual, demographic group, or team. All our software is professional grade with no pop-up or dialogue boxes intruding on the presentation. We can seamlessly accommodate on-the-fly questions and unplanned demographic filtering. Powerful enough to re-ask, reorganize, reset, and summarize voting questions with only a key press.

What we do-

Tallen starts by asking the right questions – each event is different and requires a personalized approach. Our senior consultants work with event producers to identify meeting objectives and create interactive content to achieve those goals. In-house editorial staff proof questions for clarity, substance, grammar, and efficiency – we make sure each interaction is optimized for the desired outcome.

On-site, your dedicated technician will handle everything the equipment, providing slide reviews and rehearsals with presenters, customizing, editing and printing final versions of questions, and running the show. All Tallen ARS technicians have a minimum of five years of experience and are always prepared for the unexpected.

At the conclusion of the meeting, your technician will assemble and deliver all reports, tailored to your specifications; as raw data in Excel, sharable PowerPoint presentation, locked PDF documents, and formatted html for posting on the web.

-Why choose Tallen for ARS

Experience – One of the longest-standing ARS companies in the industry, Tallen began in 2002 and has thousands and thousands of successful events in our history.

Technology – One size does not fit all. At Tallen we specialize in matching technology to the goals and budgets of our partners. We offer everything from the latest ultra-compact keypads to the most sophisticated multi-digit, full LCD display models. We have software solutions for all types of meetings from strategic planning and elections to testing applications and custom game shows.

Partnership – Tallen partners with our clients to ensure the most effective use of the technology. We are not in the business of mass-producing meetings, we truly believe in working with our partners to create one outstanding event at a time. Customer loyalty is our most valuable asset.

Service – We provide in-person and on-line demonstrations, facilitator’s guides, question development assistance and coordination of audio-visual requirements. Our consultants and technicians routinely rise above their job responsibilities to ensure the success of your meeting. Our client surveys consistently show satisfaction rates over 98%.

Value – Tallen’s pricing structure is straightforward, predictable, competitive – and best of all, no hidden charges.

- Management Meetings
