

RING SCREEN

Let Tallen Technology create an experience at your next event

The Ring Screen is a new innovation that changes how your attendees will experience your message. With the ability to display a video in 360 degrees, the Ring Screen becomes the center of attention at any event, allowing your attendees to see your imagery from anywhere in the room. Tallen Technology Rentals can help you design and execute the right message for your specific event.

The Ring Screen can be displayed in a variety of different formats based on the needs of your event. The screen imagery can be arranged as one single 360 degree image, 180 degree images, or six separate images rotating around the screen. The ring screen is equipped with routed imaging, image magnification, and 180 degree blend, and is HD capable, to make your event unforgettable.
