

INTERACTIVE PEN DISPLAY

The SMART Podium ID350

The SMART Podium ID350 marries versatility and compactness to work where you do. Ideal for small desktops or lecterns, the versatile ID350 has a 15" (38.1 cm) screen that lets you write over any presentation in digital ink, highlight concepts and take notes. Your audience will see your writing projected onto a large screen as you deliver prepared or impromptu material.

SMART Podium Has Robust Capabilities

Interactive screen – Control your computer with the pen tool. Write over any application. The pen tool is the point of contact on the screen so you don't have to worry if you brush the screen with your palm or sleeve. Each screen display is designed with sharp corners, straight sides and a flat bezel so there is nothing to impede your natural writing flow.

Battery-free tethered pen – Write smoothly and comfortably with the attached pen. Because the pen is battery-free, there's no maintenance cost or downtime searching for replacement batteries.

Pen-tool buttons – Change ink color, or use the eraser without crowding your display with toolbars.

Function buttons – Quickly access the right mouse button, On-Screen Keyboard, Screen Capture tool, Floating Tools toolbar and Notebook software.

On-screen display buttons – Fine-tune display properties to suit your preferences.

Adjustable tilt stand – Move the console to a comfortable viewing angle.

VESA mounting plate – Integrate the SMART Podium ID350 interactive pen displays with any standard VESA mounting arm (75 mm for the ID350).

The SMART Podium allows all screens to display the same image

Use the software you're used to – such as Microsoft Word, PowerPoint and Excel, or even your Web browser – and save all your notes afterwards. The ID350 is simple enough for every presenter to walk up and use, but capable enough to satisfy your most demanding requirements.
